We're for everyone

We want everyone to drive electric. That's why we've designed chargers that are, on average, **30%* less than our competitors**. Because, with 68%** of people citing cost as a barrier to EV adoption, making stylish and reliable chargers at affordable prices just feels like a no brainer.

We've already helped thousands of customers make the switch to EV. Whether you're ready to **GO**, **SPRINT** or **BOLT** we're here to make the journey easy, for everyone.

*12 untethered chargers compared, source: Google Shopping, September 2024 **renewable energy installer, Sept 2024

Building a greener future.

Travel shouldn't cost the earth – and in our mission to tackle climate change, we've manufactured affordable EV chargers that'll help drive our way to a greener, electric future.

We've also partnered with Cool Earth and Earthly to balance our footprint. These charities connect us with projects that support our ESG goals, working not only to offset our emissions but also to protect biodiversity and local communities.

details

EDC01

vecGO DUO

- ✓ Comes with both Type 2 cable and universal socket for easy charging
- ✓ Charge two cars at once with a split 7.4kW output—no one gets left out!
- ✓ The UK's most affordable dual charger

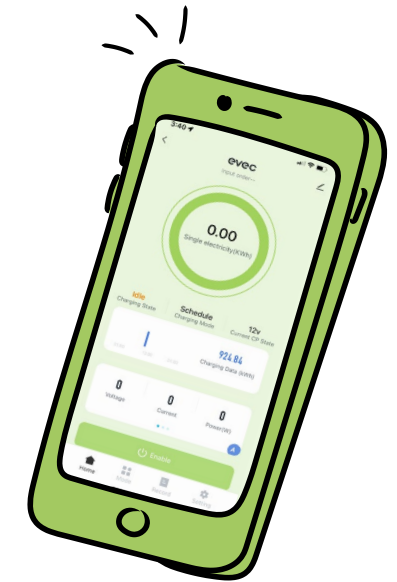

evec app

Download our **fancy** app

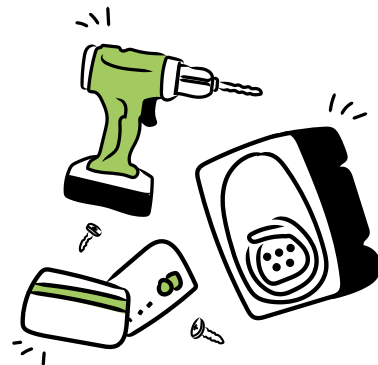

Get full control over your EV charging,
it's simple to use and easy to set up.

- ✓ Turn on and off
- ✓ Schedule charging
- ✓ View charge status
- ✓ Monitor usage
- ✓ Enter manual mode for simple plug & play

Installation in three **easy** steps

How does it work?

- 1 Choose your charger** – Pick from our popular untethered or tethered options
- 2 Pick your payment** – Pay upfront, in 30 days, or spread it over three payments with Klarna
- 3 Get it installed** – Our evec-approved installers will sort the rest, hassle-free

Just scan the QR code, pick your perfect charger, and the rest is simple!
Installation is arranged at a time that works for you, and every charger comes with a 3-year warranty.

Got questions? We're just a phone call or email away.

Power up your business with **commercial chargers**

Our commercial charging range is designed to make EV charging as easy as ordering your morning coffee.

Whether you're a small business wanting a charging solution for employees, a site owner keen to monitor usage, or a car park operator ready for rapid charging and monetisation, we've got everything you need to **GO**, **SPRINT**, or **BOLT** into the EV future.

three-phase wall charger

Available in untethered or tethered options, perfect for commercial sites that need reliable, fast charging.

VEC02

Three-Phase Untethered Charger

- ✓ Universally compatible socket for any EV or PHEV
- ✓ Charges up to 22kW, almost three times faster than domestic chargers
- ✓ Easily pair with our dynamic load balancing kit for future scalability as your needs grow

Scan here for product details

VEC04

Three-Phase Tethered Charger

- ✓ Convenient tethered Type 2 cable
- ✓ Charges up to 22kW, almost three times faster than domestic chargers
- ✓ Easily pair with our dynamic load balancing kit for future scalability as your needs grow

vec SPRINT

Pedestal charger

Need to charge one car? Two?
We've got **up to 22kW** of power for that.

Our 22kW superfast charging OCPP-compliant pedestal is compatible with all EVs. It can be controlled in multiple ways including plug & play, via pay-to-charge solutions, or via our evec app. The charger's integrated LED light also gives users great visibility of the charge point and bays – even on those dark winter nights. Plus, with next-day delivery available on our pedestal range, upgrading has never been quicker.

Where can the pedestal be used?

- ✓ Private and company car parks
- ✓ Leisure areas and hotels
- ✓ Development and construction sites
- ✓ Councils and other public locations

Key features:

- ✓ Plug and charge or mobile app-controlled charging
- ✓ 4G / Wi-Fi / Ethernet connectivity
- ✓ Built-in over current and 6mA DC leakage protection
- ✓ Built-in Single and Three Phase PEN protection
- ✓ OCPP 1.6J SON compliant
- ✓ Over-the-air updates and ongoing investment in technology
- ✓ Dynamic Load Management ready (CT clamps provided)
- ✓ Available as 7.4kW or 22kW
- ✓ 48-hour on-site engineer support as part of the standard warranty
- ✓ Available in single or dual socket models

vecPAY in 3 simple steps:

Optional add-on

Control your power the **dynamic** way

Deliver power to the right charger,
at the right time, with our new
Dynamic Load Balancing (DLB) kit.

Which chargers is this available for?

The DLB kit is available across our home chargers (VEC01 & VEC03), commercial wall-mounted chargers (VEC02 & VEC04) and all Pedestal chargers.

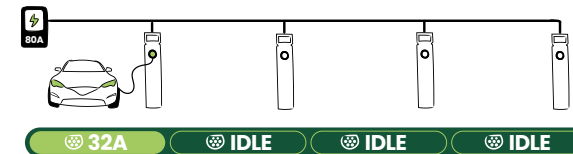

Scan to find
out more

Dynamic Load Balancing example:

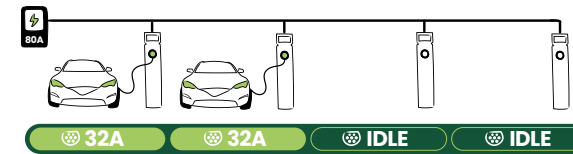

1. Vehicle A arrives to charge

Full power is available, so it gets a full charge.

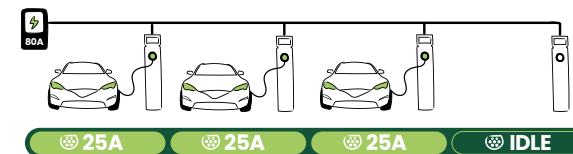

2. Vehicle B arrives to charge

Power is now shared between A and B, so both receive equal charge.

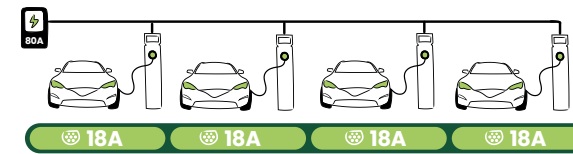

3. Vehicle C arrives to charge

The system adjusts, splitting power evenly between A, B, and C.

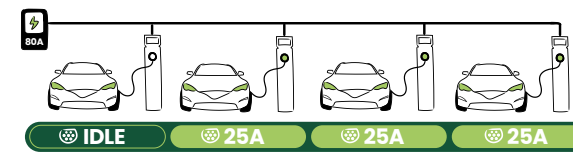

4. Vehicle D arrives to charge

Now, all four cars share the available power.

5. Vehicle A reaches full charge

It stops charging, and the system redistributes power among the remaining vehicles.

Key things to know:

- A full charge session will be limited to either the cable's max or the chargepoint's max—whichever is lower
- Remaining power is shared equally among active chargers, with a minimum of 6A each
- If power gets too high, some cars charging at full power will be reduced, so everything balances out

vecBOLT

DC Charger

A **rapid 40kW** charger for when speed matters most – because nobody likes waiting around.

No matter your setup—commercial site, office, or public space—we're here to help. We're ready to guide you every step of the way—from the tech talk to the installation, and even show you how to turn those chargers into money-makers. Simple, smart, and seriously powerful. Ready to get started?

dual or single version available

Where can the DC charger be used?

- ✓ Private and company car parks
- ✓ Leisure areas and hotels
- ✓ Development and construction sites
- ✓ Councils and other public locations

Key features:

- ✓ Delivers 40kW of power for rapid charging
- ✓ Easy-to-use with an intuitive interface
- ✓ Easy to monitor with RFID, Payter, plug and play, or back-end system control for businesses
- ✓ 4G / WiFi / Ethernet connectivity
- ✓ Built-in over current and 6mA DC leakage protection
- ✓ OCPP 1.6J compliant
- ✓ Over-the-air updates and ongoing investment in technology
- ✓ 3-year warranty with option to extend
- ✓ Weatherproof up to IP54 protection
- ✓ Wall mount as standard, with options for charger base and Payter payment terminal

MONTA.

Monetise your

charger today

- ✓ Create an additional revenue stream by offering convenient charging to employees, customers, or the public
- ✓ Monetise your home or business charge points easily and charge £/kWh or £/min
- ✓ Monitor users, usage and access via our backend partners

Office for Zero Emission Vehicles

OZEV Grant

The Office for Zero Emission Vehicles (OZEV) has provided the EV Infrastructure Grant to support small-to-medium-sized businesses with no more than 249 employees.

- For new non-residential buildings that have more than 10 parking spaces, at least one EV charge point and cable routes must be installed for 20% of the total number of spaces
- The maximum amount of the grant is £15,000
- Up to £350 per charge point socket
- Up to £500 per parking space enabled with supporting infrastructure

the OZEV Grant**

Your evcc warranty

All our chargers come with **3-year parts and labour warranty** as standard. Your warranty includes support from our friendly technical team as well as our industry-leading 48-hour engineer callout service in the unlikely event of an issue with your charger. What's not to love?

Fancy an extension?

You can **extend your warranty up to 5 years from as little as £5** per month via our warranty partner, Protect my Products. The extended warranty also includes extra features to make sure your charger can power your electric journey for as long as possible.

Protect my products

Get sorted in 3 repairs or less

If we can't fix your charger after 3 repairs, you'll get a voucher or replacement.

No hidden costs

Parts, labour and callouts are all included in your plan.

Cancel without the faff

Cancel your plan easily, at any time.

Get up and running quickly

In the event of a fault, we'll have someone out to repair your appliance in 48 hours.

The UK's most **affordable** smart EV charger.

We're for everyone.

What our customers are saying...
